

Less prep. More time for what matters.

Learn how to use AI to plan classes, build course materials, and clear routine work in a fraction of the time.

THIS WEEK'S PREP

- ☒ ~~Draft the syllabus~~
- ☒ ~~Write a quiz and answer key~~
- ☒ ~~Build a grading rubric~~
- ☒ ~~Reply to 40 student emails~~
- ☒ ~~Summarize meeting notes~~

Done in minutes, not hours

WORKSHOP

1:00 PM

Friday, September 18

FOLLOW-UP SESSION

12:30 PM

Thursday, October 15

McPheeters-Dennis Hall, Room 150B Both sessions meet in the same room

Before you come

- 1 Bring your laptop**
Charge it up. We will work hands-on the whole time.
- 2 Create a free Claude account**
Scan the code to sign up before the workshop.
- 3 Upgrade to a paid plan** **RECOMMENDED**
You get much more use each day and the full set of features we will cover.

YOUR PRESENTER

Dr. Dewayne A. Dixon

Assistant Professor, Department of Mathematical Sciences

Dr. Dixon holds a PhD in Mathematics from Howard University and a BS from Morehouse College. He gives talks on how to use generative AI and on the mathematics behind how AI models are built. Through the AUC Data Science Initiative, he has trained faculty at HBCUs across the country. His research uses machine learning to study complex biological data, such as DNA markers of PTSD.

No experience needed. All faculty and staff are welcome.
