YOUR TAKE-HOME GUIDE

One assignment, start to finish.

Ready to try it on your own? Start on page 2 and go one step at a time.

Your guide, one step at a time

☐ **Get set up** — First time only: make a free account. — Page 2

☐ **Step 1 · Grade it** — Turn your answer key into a rubric. — Page 3

☐ **Step 2 · Remake it** — Write new versions of the same question. — Page 4

☐ **Step 3 · Teach it** — Make a review slide for your class. — Page 5

? **If you get stuck** — Quick fixes, and one thing to try this week. — Page 6

Words you'll see

Claude: the AI tool we use. A website, claude.ai. Free to start.

Prompt: the words you type to it.

Chat: one conversation. It remembers what you typed earlier in it.

New chat: a blank page. It starts over.

Two rules

1. Never paste in student names, ID numbers, or grades.

2. AI drafts. You decide. Check what it writes.

Stuck or unsure? Email **ddixon1@cau.edu**. No question is too basic.

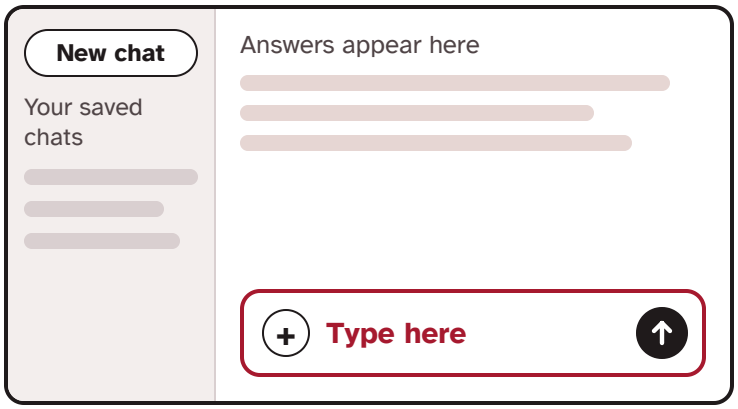

All of today's prompts, ready to copy: drdixon24.github.io/cau-ai-workshop

Make your free account

You only do this once. About 5 minutes. Go slowly. Nothing here can break.

1. Open your web browser: Chrome, Safari, Edge, or Firefox.
2. Click the address bar at the very top. Type **claude.ai** and press **Enter**.
3. Type your email and click **Continue with email** (or **Continue with Google**). Open the email it sends and use the code or link. The first time, this makes your free account.
4. Find the big empty box. That's where you type.
5. Click **New chat** for a blank page. Use that one chat for Steps 1 to 3. It remembers what you typed earlier.

Or scan with your phone camera

Most AI chat screens look something like this. Press **Enter** or click the round arrow to send. Click **+** to attach a file.

Copy and paste

Select
Click and drag across the words.

Copy
Mac: Command + C
Windows: Ctrl + C

Paste
Mac: Command + V
Windows: Ctrl + V

☐ **I'm signed in and I see the box where I type.** Turn to page 3.

Use ChatGPT, Copilot, or Gemini instead? Everything here works there too.

Grade it

Turn your answer key into a rubric. About 15 minutes.

1. Type this into the box:

   Make a 5-point rubric with partial credit for this question. List the most common mistakes.

2. For a new line, hold **Shift** and press **Enter**. (Enter alone sends it.) Then paste your question and your answer key. Or click **+** to attach the file.

3. Press **Enter** to send. Wait up to a minute. The answer appears a line at a time.

4. Read the rubric. Would you grade it this way? It words things differently each time. That's normal.

5. Change anything you want, in plain English. For example: **"Make item 2 worth 2 points."**

No assignment with you? Use this question.

A headline says coffee drinkers live longer. Explain why that doesn't prove coffee is the cause.

You can skip the answer key. Just type the question under the words from step 1.

One thing I would change in my rubric:

_____

_____

☐ **I have a rubric.** Stay in this same chat for Step 2.

Remake it

Write new versions of the same question. About 12 minutes.

Stay in the same chat. Do not click New chat.

The AI remembers your question and rubric from Step 1.

1. Type this into the box:

   Write two new versions of this question. Same skill, same difficulty. Include a strong answer for each.

2. Press **Enter** to send. Wait up to a minute.

3. Pick one version and answer it yourself. Is the AI's answer right?

   ☐ Yes, it's right ☐ It needs fixing

4. Want something different? Try: **"Make one easier and one harder."** or **"Turn it into a multiple-choice question."**

Where could I use the new versions?

☐ Makeup work
☐ Another section of my course
☐ Next semester
☐ Practice for students

My notes:

☐ **I have two new versions.** Stay in this same chat for Step 3.

Teach it

Turn your question into a review slide for class. About 12 minutes.

Still the same chat. Do not click New chat.

1. Type this into the box:

   Turn this question into one review slide: the main idea, an example, and the most common mistake.

2. Press **Enter** to send. Wait up to a minute.
3. Read it. Too long? Type: **"Make it shorter."**
4. You get the words for a slide, not a finished slide. To keep them, click the **Copy** button under the answer (it looks like two overlapping squares). Then paste into PowerPoint, Google Slides, or Word.
5. Rather have a handout? Type: **"Make this a half-page handout instead."**

Look what you made from one question

- ☐ A rubric
- ☐ Two new versions
- ☐ A review slide

My notes:

☐ **I have a review slide.** You finished all three steps.

If you get stuck

Try these first. You can't break anything. Still stuck? Email me.

If this happens	Do this
I can't log in.	Email **ddixon1@cau.edu** and tell me what you see. I'll help.
The answer has a mistake.	Tell it in plain English: **"Item 2 is wrong. Fix it."**
The answer is too long or too hard.	Type: **"Make it shorter."** or **"Make it simpler for first-year students."**
I don't understand the answer.	Type: **"Show every step."** or **"Explain that more simply."**
I clicked New chat by mistake.	Look at the list of chats on the left. Click your earlier chat. No list? Click the menu icon at the top left.
I closed the window.	Go back to **claude.ai**. Your chats are saved in the list on the left.
It says I've reached a limit.	Free accounts have a daily limit. Wait a few hours, or come back tomorrow.

Your one thing this week

Make a rubric for one assignment you are giving this week.

The assignment I'll try: _____

I'll do it by (date): _____

All of today's prompts: drdixon24.github.io/cau-ai-workshop

Questions? Dr. Dewayne A. Dixon, **ddixon1@cau.edu**
