Clark Atlanta University
Department of Mathematical Sciences

FACULTY AI WORKSHOP
FALL 2026 · OPEN TO ALL FACULTY

EVERY DISCIPLINE · BEGINNERS WELCOME

Bring one assignment.
Leave with a rubric.

A relaxed, hands-on session. We take one question from your assignment and use AI to grade it, remake it, and teach it. No jargon, no coding, no rush.

YOU TYPE, IN PLAIN ENGLISH

Make a 4-point rubric for this question:

A headline says coffee drinkers live longer. Explain why that doesn't prove coffee is the cause.

AI DRAFTS THE RUBRIC

- 1 pt — A link isn't proof of cause
- 1 pt — Names a factor, like income
- 1 pt — Explains how it drives both
- 1 pt — Writes clear, full sentences

You still make the final call.

One assignment, start to finish

Watch first. Then try it, with help.

STEP 1
Grade it
Your answer key becomes a partial-credit rubric.

→

STEP 2
Remake it
Same skill, new questions, model answers.

→

STEP 3
Teach it
A review slide on the most common mistake.

OCT 15 THURSDAY

12:30 PM
McPheeters-Dennis Hall
Room 150B

Bring with you

- ☐ Your laptop
- ☐ One quiz or assignment

Never used AI? Perfect.

YOUR PRESENTER

Dr. Dewayne A. Dixon

Assistant Professor, Mathematical Sciences · **ddixon1@cau.edu**

PhD in Mathematics, Howard University. BS, Morehouse College. Through the AUC Data Science Initiative, he has trained faculty at HBCUs across the country.

No question is too basic. All faculty are welcome.
